In some conditions the gain from the use of Scott's Emulsion is very rapid. For this reason we put up a fifty-cent size, which is enough for an ordinary cough or cold or useful as a trial for babies and children. In other conditions the gain is slower—health cannot be built up in a day. In such cases Scott's Emulsion must be taken as nourishment; a food rather than a medicine. It's a food for tired and weak digestions.

New-paper subscription.

The following is a synopsis of a ruling of the United States Supreme Court in an important case regarding newspaper subscription:

1. Subscribers who do not give express notice to the contrary are considered as wishing to renew their subscriptions.

2. If subscribers neglect or refuse to take their periodicals from the post office, they are responsible until they have settled their bills and ordered the paper discontinued.

3. If subscribers order the discontinuance of their periodicals, the publisher may continue to send them until all arrears are paid.

4. If subscribers move to other places without informing the publisher and the paper is sent to the former address, subscribers are held responsible.

5. The courts have decided that returning to take periodicals from the office, or removing and leaving them unclaimed for is prima facie evidence of intentional fraud.—Ex.
